## SEWAGE TREATMENT

**Surplus never used Orca II-A sewage treatment plant (36 man) for sale.**

The **Orca II-A** type 2 made by Envirovac (Evac) was purchased new and installed on a vessel which only operated in fresh water. Due to local regulations and the vessel changing operating waters, the sewage treatment plant was not allowed to be used, thus never started.

It is in excellent condition because of the freshwater environment the vessel operated. Paint from crew working inside of the vessel has been spilled on a couple places on the unit. This 36 man type II ( 2 ) treatment plant was built in 1997 and carries the USCG certificate 159.015/6304/1 for inspected and un-inspected vessels. The plant was designed for 1080 gallon per day. Unit is 350 lbs dry / 490 lbs wet, measures 44" x 23" x 46" high. Piping is 3" in, 3/4" out, 1-1/2" vent and 1/2" backwash.

Data label from unit:

Orca II-A -36, RST 97029-MK, May 1997

Data label from controller:  
 RCP97060-ME, 230 V, 1 PH, 30 Amps

**We are accepting offers to take to the vessel owner.** The unit is in our warehouse in Seattle for inspection.

**The JKF Emergency Towline Storage Reel.** The JKF emergency towing reel is a simple and proven means of storing the emergency tow line. When the pick-up line is pulled, the emergency tow line runs completely off of the reel and engages with the auxiliary tow chain, allowing you to continue the tow and complete your voyage. The storage reel is designed and engineered to survive the salt water elements and to provide years of reliable service with its large wire capacity, stainless steel tension brake, bolt-down mount, and protective cover. With the bolt-down mounting design this system can be simply switched from barge to barge or stored in your warehouse for the next voyage.  
**Not Just for Barges...**  
THIS SYSTEM CAN BE UTILIZED ON SHIPS, FERRYS, CRUISE SHIPS, TANKERS AND MUCH, MUCH MORE.. Standard Model Capacity: 1,600' of 1 ¾" / 1,200' of 2" / 900' of 2 ¼"  
Can be custom built to meet your needs!  
**JKF System Features:** Large capacity tow wire, Designed to retrieve and then continue tow, Can be used with wire or spectra line, Reusable time and time again, Wire is lubed and covered, Can be mounted above or below deck.

**FOR SALE - TOW WINCH**  
Everett Engineering has completed refurbishment of a hydraulic drive Almon-Johnson towing winch. The auto-tensioning system has been eliminated, and a new 60 inch stainless steel drum added for additional braking capacity. Heavy duty manual/air drive and brake control stations have been added, along with a suitcase drum. New bearings throughout. Capacity: 2600 ft. x 2 inch wire. Paint is zinc primer, with marine epoxy finish (Black). \*The stainless drum provides for rust free operation, preventing the scale buildup that causes reduced braking and high lining wear.
